

# Isn't it time compliance was made easier for you?

The Oklahoma Rural Water Association thinks so...

ORWA, through its partnership with SEMS Technologies, has found a tool, the SEMS Software Suite™, that truly makes your job easier for Compliance, Routine Sampling and Regulatory Agency Reporting.

## What is SEMS Software Suite™?

It is a custom designed software tool especially built for drinking water and wastewater utilities to help ensure compliance. SEMS provides the ability for you to easily meet regulatory requirements, keep up with sample collection schedules and results data, and helps you manage several administrative operations. It's simple to use and follows a step-by-step approach to make the usage as easy as it is to turn a valve.

## How will SEMS Software Suite™ help me TODAY?

- Comprehensively handles IDSE compliance, (for the **April 1, 2008 deadline** and subsequent requirements)
- Produces Consumer Confidence Reports from the sampling data to the **finished document** to send to customers
- Creates printable **daily, weekly, and monthly** sample collection **calendar with pop-up alarms**
- At a click of a button complies and **creates** required **compliance reports**
- Dramatically **reduces transition** impact of personnel **turnover**
- Saves you significant **time** and considerable **money**

## Will SEMS help me through compliance in the future?

The SEMS Software Suite™ will be continually updated to ensure you are able to meet the latest in compliance requirements. As regulations change, so will SEMS.

## Can SEMS work with my state regulations?

SEMS not only addresses many federal regulatory requirements but also state primacy agency directives as well. Our experience tells us that every state is unique and requires flexibility to make the system effective.

## How do I get SEMS?

To make this tool affordable to even the smallest water services, SEMS is a subscription as low as \$24.95 per month.\* (If you prefer, it can be paid annually.)

(\*6 months required.)

Isn't it time you had help with your regulatory compliance?
